

The Mount Sinai Medical Center Chinatown is designed to meet the needs of the people who live and work in Lower Manhattan.

Offering Excellence in Specialty Care

Staffed by physicians at the top of their profession, The Mount Sinai Medical Center Chinatown practice offers the highest quality specialty care. Our multicultural physicians and staff speak English, Mandarin, Cantonese, and Spanish, and they are dedicated to delivering superior care in a warm and supportive environment.

Our facility, which houses both medical and surgical specialties, offers comprehensive outpatient care, including management of chronic conditions and pre- and post-hospital care, on-site in Chinatown. When patients require hospitalization for an illness or injury, or when surgery is their best option, we admit them to The Mount Sinai Hospital, which was named by *U.S. News & World Report* to its 2012–2013 Honor Roll of elite hospitals.

About The Mount Sinai Medical Center

The Mount Sinai Hospital is a 1,171 bed academic medical center and one of largest and most-respected voluntary hospitals in the country. The Mount Sinai Hospital has been named by *U.S. News & World Report* to its 2012–2013 Honor Roll of elite hospitals, based on reputation, safety, and other patient-care factors. The Mount Sinai School of Medicine is one of the leading medical schools in the United States. Our medical school is noted for innovation in education, biomedical research, clinical care delivery, and local and global community service and ranks among the top 20 medical schools both in National Institutes of Health (NIH) funding and by *U.S. News and World Report*.

The Mount Sinai Medical Center Chinatown Treats the following conditions

ANORECTAL DISORDERS

We treat the full spectrum of anorectal disorders, including hemorrhoids, fecal incontinence, fistulas, abscesses, and fissures. We also offer the most advanced screenings, including endorectal ultrasound, to diagnose these and more serious conditions, such as anal cancer. In addition, we excel in laparoscopic colon and rectal surgery and transanal rectal resection (STARR).

CANCERS

Housing specialists in both colorectal and lung cancer, as well as surgical oncology, we offer access to the most up-to-date services available for the diagnosis and treatment of these diseases. Mount Sinai ranks as a world leader in diagnosing and treating lung cancer. Medical sites throughout the United States and around the world following our lung screening protocol.

In addition, to achieve the best possible outcomes, patients admitted to Mount Sinai for cancer treatment are cared for by a multidisciplinary team of specialists who work together to create an individual treatment plan for each patient. When surgery is required, we use the most minimally invasive procedures possible, including robotic surgery, for both colorectal and lung procedures.

SPORTS MEDICINE

Dedicated to helping patients reach their maximum physical function, we employ comprehensive therapeutic techniques to treat injuries ranging from tennis elbow to bone fractures, and from rotator cuff to head trauma.

RHEUMATOLOGY

We provide compassionate, state-of-the-art care to patients suffering from frequently painful and debilitating autoimmune diseases such as rheumatoid arthritis, connective tissue diseases, crystal deposition diseases, osteoarthritis, osteoporosis, and systemic lupus erythematosus.

LIVER TRANSPLANTATION

Patients requiring liver transplantation are admitted to Mount Sinai's Recanati/Miller Transplantation Institute, where our transplant specialists have successfully performed more than 3,000 liver transplants and over 250 living donor liver transplantations.

NEUROSURGERY

As a recognized leader in neurosurgery, Mount Sinai offers advanced treatments for brain tumors, spinal disorders, stroke, brain aneurysms, epilepsy, and other neurological disorders. Our neurosurgeons are pioneering new techniques in skull-base and minimally invasive surgery to greatly reduce recovery times and optimize the health of our patients.

HEMATOLOGY/ONCOLOGY

Mount Sinai delivers patient-focused, world-class cancer care, provided by highly respected specialists. Our commitment to whole person care ensures that the entire cancer treatment process is individualized and focused on treating each patient's physical, emotional and spiritual needs.

HEART AND LUNG DISORDERS

The cardiothoracic surgery faculty practice provides state-of-the-art care for heart and lung disorders. Mount Sinai's cardiac surgeons have expertise in a variety of advanced surgical techniques and technologies, and are dedicated to offering the best possible treatment to patients with a wide range of diseases and disorders.
