At Mount Sinai Heart, we offer our patients state-of-the-art diagnostics, prevention programs, and the latest research-based treatments, as well as compassionate patient-focused care. Some of our nationally and internationally recognized subspecialties include:

**Aortic Diseases and Surgery**
Mount Sinai Heart is recognized worldwide for our ability to surgically treat aneurysms.

**Arrhythmia-Heart Rhythm Disorders**
We have been a pioneer in cardiac electrophysiology and in treating abnormal heart rhythms for more than a century.

**Cardiac Surgery and Mitral Valve Repair**
Mount Sinai Heart offers one of the highest percentages of successful heart surgery anywhere in the world.

**Cardio-Oncology**
Chemotherapy can sometimes cause damage to the heart. We provide the most effective chemotherapy agents while also protecting the heart.

**Cardiovascular Genetics**
Mount Sinai Heart is dedicated to evaluating, counseling, and treating patients and families with genetic-based cardiovascular diseases.

**Heart Attack-Coronary Artery Disease**
We provide comprehensive diagnosis and cutting-edge treatment for the most common type of heart disease.

**Heart Health-Prevention**
Our programs target people who are at-risk for heart disease early.

**Heart Failure and Transplantation**
We treat and manage people who are living with mild, moderate, and advanced congestive heart failure.

**Heart Imaging**
Using the latest imaging equipment, we can identify conditions earlier and with greater accuracy than ever before.

**Heart Valve Disease**
Mount Sinai Heart physicians have invented devices and pioneered techniques to treat valve disease.

**High Blood Pressure**
We take a team approach to providing comprehensive diagnostic and therapeutic services to patients with high blood pressure.

**Hypertrophic Cardiomyopathy**
We use medication, surgery, and pacemakers, to treat this common condition.

**Pediatric and Congenital Heart Disease**
Our cardiologists specialize in complex and high-risk cases, including some formerly considered inoperable.

**Pulmonary Hypertension**
We use a combination of proven treatments and pioneering therapies to diagnose and treat pulmonary hypertension.

**Cardiac Rehabilitation**
After treatment, our team of specialists works with you to monitor your condition and progress.

**Structural Heart Disease**
Our structural heart disease patients are treated by a team of general cardiologists, interventional cardiologists, and cardiovascular surgeons.
