Infection Control Barrier Precautions

Course Description

Infection Control and Barrier Precautions training course provides the necessary information and documentation to fulfill the licensure/credentialing requirements mandated by the New York State Education Department and the Department of Health.

Chapter 786 of the Laws of 1992 amended the Education and Public Health Laws establishing a requirement that certain healthcare professionals licensed in NY State must receive approved training in infection control and barrier precautions by July 1, 1994; and every four years thereafter. Infection Control training is to prevent the transmission of Human Immuno-deficiency Virus (HIV) and the Hepatitis B (HBV) in the course of professional practice.

You will receive your certificate at the end of the course

Schedule and Locations

2016, 2017

	Sign up for:	Time	Price	Mount Sinai Hospitals PBSON Grads
	Call to schedule		\$35	\$25

Infection Control Training Goals: Six Elements of Training

Assure that you:

- Know the law requiring this training and the consequences for noncompliance
- Understand how blood borne pathogens may be transmitted in the work environment to patients and providers
- Know how to apply infection control principles
- Know how to minimize transmission of pathogens

Who: Does this apply to you?

- Dentists and hygienists
- Physicians and physician assistants
- Registered professional & licensed practical nurses
- Optometrists
- Podiatrists
- Special assistants
