

# TISCH CANCER INSTITUTE

THE TISCH CANCER INSTITUTE is a comprehensive cancer center that unifies basic, clinical, and translational research programs and clinical care programs under one umbrella. A nexus that draws on Mount Sinai's state-of-the-art resources, the TCI connects cancer experts with leaders in genetics and genomics, surgery, radiation, and other disciplines to combat cancer on every front.

The core of our cancer enterprise, **CENTRAL TCI PROGRAMS** lead clinical and scientific efforts in many cancer specialties and research areas. Through **AFFILIATED CLINICAL PROGRAMS**, the TCI offers access to clinical trials and sophisticated treatments. Collaborating with **AFFILIATED RESEARCH PROGRAMS**, the TCI explores underlying mechanisms of cancer and innovative therapeutics.

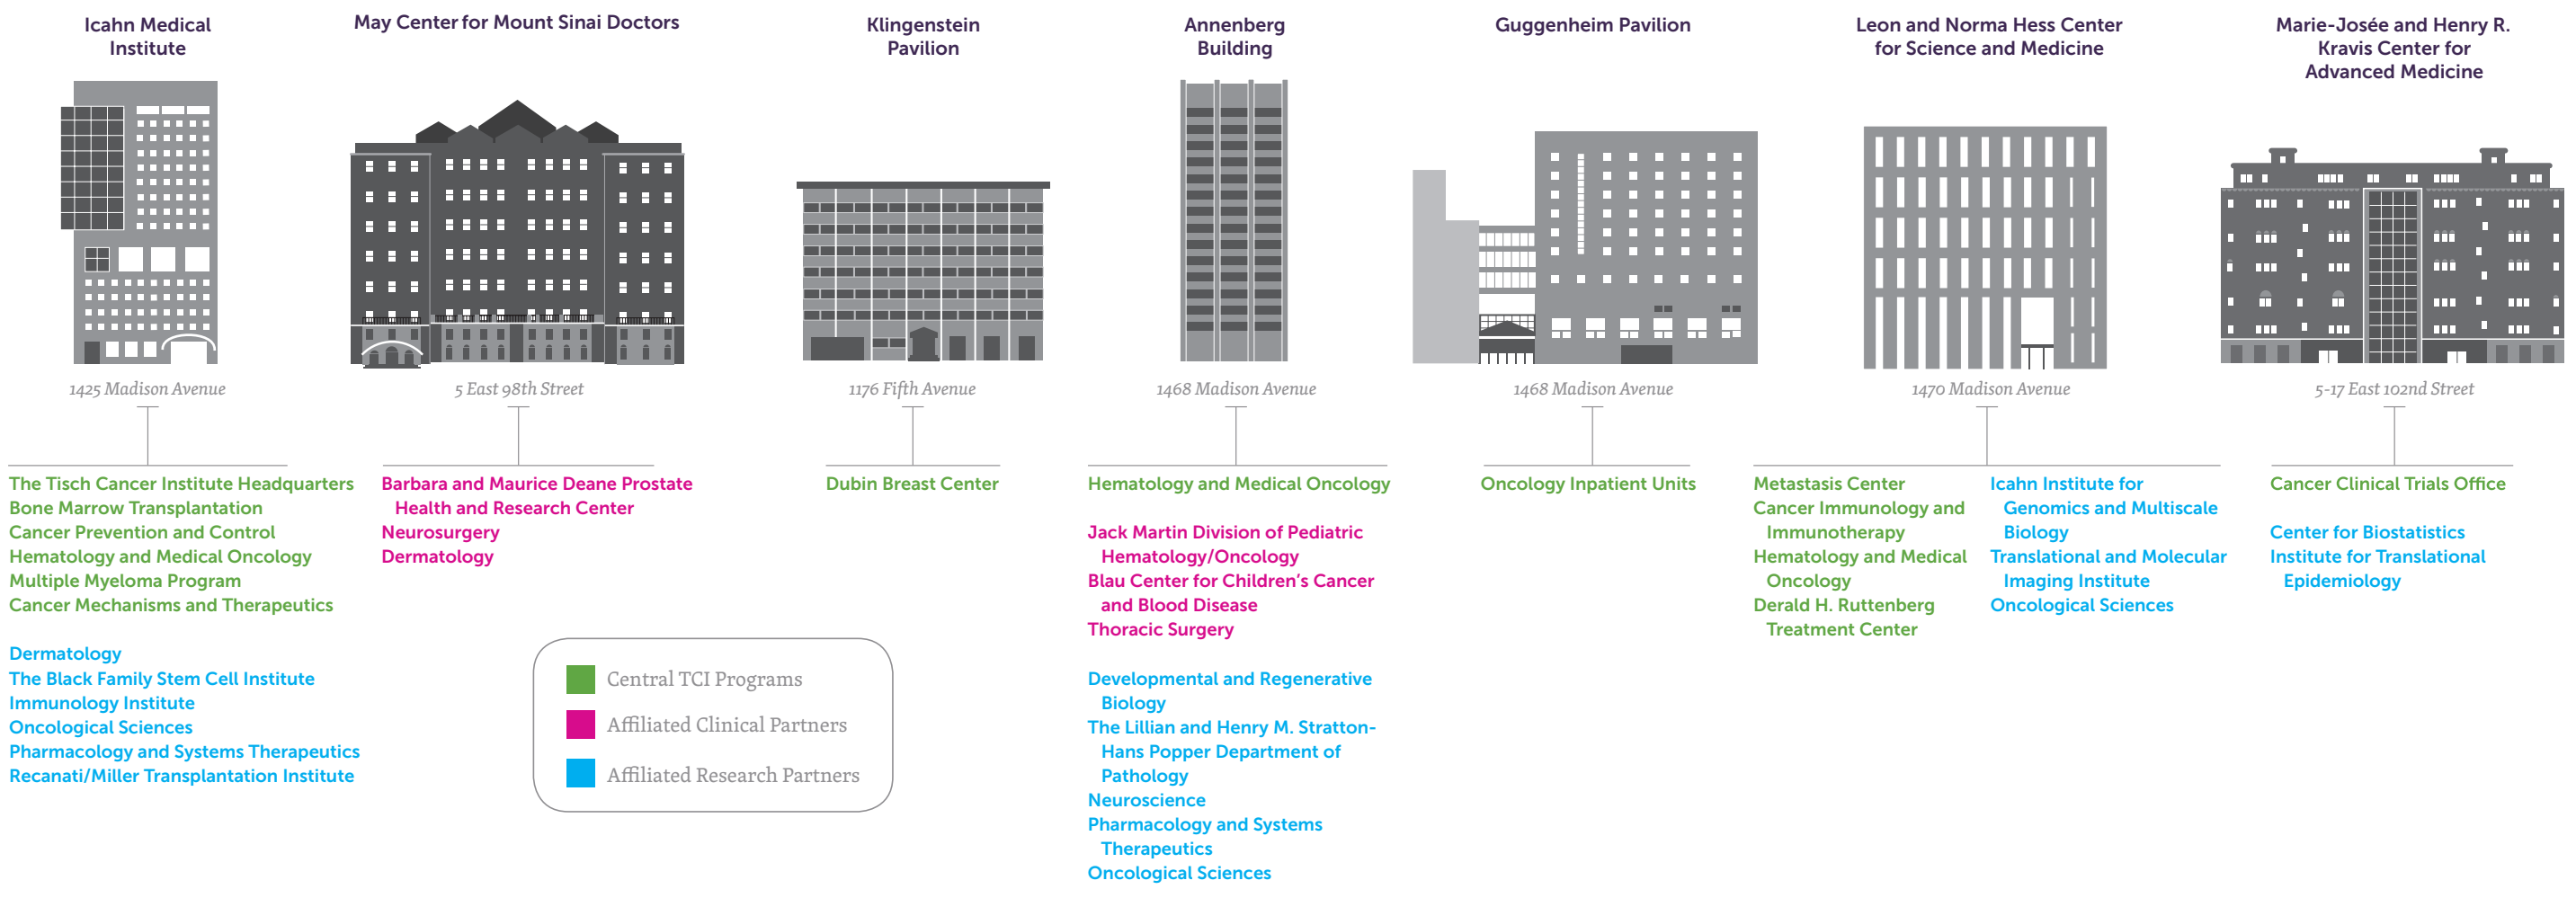

## THE TISCH CANCER INSTITUTE ON THE MOUNT SINAI CAMPUS

FIFTH AVENUE

**WHERE YOU'LL FIND THE TISCH CANCER INSTITUTE:** The TCI is a complex, dynamic enterprise, seamlessly integrated throughout the Mount Sinai campus. Comprising nearly 250,000 square feet, its geographic footprint is among the largest of any Mount Sinai institute. Headquartered in the Icahn Medical Institute, TCI work is underway in nearly every building on campus.

EAST 98<sup>TH</sup> STREET

EAST 103<sup>RD</sup> STREET

**TCI IN THE HESS CENTER FOR SCIENCE AND MEDICINE:** The TCI occupies four of the 10 floors in the new Leon and Norma Hess Center for Science and Medicine—more than any other Mount Sinai institute. Two floors are dedicated to clinical care and two to research; this close proximity creates opportunities for collaboration that will drive breakthrough discoveries.

MADISON AVENUE
