## A Reputation for Excellence and Innovation

Mount Sinai Heart at The Mount Sinai Hospital is at the forefront of groundbreaking cardiovascular care and research. We are committed to developing and utilizing the safest, least invasive therapies while providing exceptional holistic care of the patient.

Dedicated to the prevention, management, and eradication of cardiovascular disease, our team of top cardiologists, surgeons, scientists, nurses, and technicians has revolutionized the science of cardiovascular medicine.

Mount Sinai cardiologists are responsible for numerous innovations in the diagnosis and treatment of heart disease, including advancements in non-invasive cardiac imaging and interventional procedures. The Hospital’s interventional cardiologists have the best safety record in all of New York State.

The team of Vascular Medicine and Vascular Surgery offers the latest in non-invasive treatment for arterial disease, aneurysms, and venous disease. Patients receive safer, more efficient, and cost-effective care with the use of breakthrough techniques allowing less invasive treatment of vascular conditions.

Our mission is to provide high quality patient care and exceptional service using evidence-based practice medicine in order to prevent heart disease and markedly improve the cardiovascular health of patients.

## Conditions We Treat

- Hypertension
- Hyperlipidemia
- Diabetes Mellitus
- Arrhythmias
- Congenital Heart Disease
- Coronary Artery Disease and Heart Attack
- Valvular Heart Disease
- Cardiomyopathy
- Heart Failure and Transplant
- Pulmonary Hypertension
- Aneurysms of the Aorta and Distal Arteries
- Aortic Dissection
- Peripheral Artery Disease
- Renal/Kidney Artery Disease
- Carotid Artery Disease and Stroke
- Carotid Dissection
- Blood Clots
- Venous Thromboembolism (DVT and PE)
- Venous Insufficiency/Varicose Veins
- Chronic leg Ulcers
- Acute Arterial Ischemia

## Specialized Programs and Services

- Cardiac Catheterization
- Coronary Balloon Angioplasty and Stenting
- Coronary Atherectomy
- Balloon Valvuloplasty
- TAVR (Transcatheter Aortic Valve Replacement)
- Cardiac Disease Prevention and Rehabilitation
- Echocardiography
- Nuclear Imaging and Stress Testing
- Cardiac Imaging (CT, MRI and PET scanning)
- Cardiovascular Genetics
- Cardiac and Rhythm Disturbances
- Holter Monitoring
- Anticoagulation Clinic
- Percutaneous closure of congenital heart defects
- Vascular Ultrasound
- Thrombin Injection
- ABI/PVR
- Carotid Stenting
- Carotid Endarterectomy
- Minimally Invasive treatment of Abdominal Aortic Aneurysm (AAA)
- Endovascular Balloon Angioplasty and Stenting
- Foam Sclerotherapy
- Ambulatory Phlebectomy
- Endovenous procedures (laser, ablation, and radio frequency)
