COVID-19 Vaccine Rollout

In New York State

Future Phases

Phase 1a

Health care workers (clinical and non-clinical) in patient care settings (e.g. ICU, ED, EMS, and other areas with direct COVID-19 exposure)

- Long-term care facility workers who regularly interact with residents
- Most at-risk long-term care facility patients

Phase 1b

- First responders (fire, police, national guard)
- Teachers/school staff (in-person instruction), child care providers
- Public health workers
- Other essential front-line workers that regularly interact with public (pharmacists, grocery store workers, transit employees, etc.) or maintain critical infrastructure
- Other long-term care facility patients and those living in other congregate settings
- Individuals 65 and older

 Individuals in general population deemed particularly high risk due to comorbidities and health conditions All other essential workers Healthy adults and children

The New York State Department of Health has developed a plan to prioritize the COVID-19 vaccine rollout in a safe and equitable way. The plan prioritizes those at highest risk for COVID-19. Health care and essential workers with prolonged and repeated exposure to COVID-19 or those at higher risk of exposure due to interactions with people of unknown COVID-19 status will receive vaccine at the beginning of Phase 1. The picture shown here illustrates the rollout plan.

We know you have questions as to when you will be able to be vaccinated and we will let you know as soon as it's available to patients. Please do not call us to schedule an appointment at this time. More details will be shared when we learn more.

Indicates where we are in the process
