# Palliative Care at Home

## A New Program to Care for Patients who Wish to Be at Home and Focus on Comfort and Quality of Life

- **Accepting seriously ill patients** with known or suspected COVID-19
- **Staffed 24/7** by physicians and nurse practitioners who will perform video or telephone visits
- **Additional phone and video support** from nurses, social workers, and community health workers
- **Medications to assure symptoms are controlled** will be delivered to the patient's home.
- **Open to patients** being discharged from the hospital or the ED
- **Patients can also be referred** by their primary care physician if patient already at home – thus bypassing the hospital
- **Rapid enrollment** from any setting at any time day or night
