

# Opening of Plasma Collection Center

July 8, 2020, Wednesday

On Monday, July 13, we will be opening a Plasma Collection Center at The Mount Sinai Hospital at 1440 Madison Avenue to collect convalescent plasma from individuals who have recovered from COVID-19. This plasma will be purified into hyperimmune globulin, which will be used in clinical research trials at Mount Sinai and elsewhere to test its ability to prevent and treat COVID-19.

As faculty, staff, and students of The Mount Sinai Hospital and the Icahn School of Medicine at Mount Sinai, you are an integral part of this mission. If you have a high concentration of antibodies to SARS-CoV-2 (titers of 1:320 or higher), you may be a candidate for plasma donation. Should you wish to consider donation, please use this link to complete the [prescreening questionnaire](#). Your confidentiality will be maintained and used exclusively for donor recruitment for plasma donation. Employees may work with their supervisor to donate plasma during work hours, if conditions permit.

If you have any questions, please contact [SinaiPlasmaDonation@mountsinai.org](mailto:SinaiPlasmaDonation@mountsinai.org).
