

Mount Sinai Health System

Adult Critical Care/ICU

New Graduate Fellowship Program

Overview

The Adult Critical Care/ICU Fellowship Program will support new graduate registered nurse (RN) fellows in the fast-paced, high-acuity adult critical care units across the Mount Sinai Health System (MSHS). The RN Fellowship graduates will be well prepared with in-depth knowledge in critical care nursing. During this challenging 24-week Fellowship Program, RN fellows will complete a bedside preceptorship with their preceptors in their assigned unit. As a system cohort, RN fellows will attend didactic lectures covering critical care concepts, pathophysiology, and nursing management of disease processes, attend Fellowship seminars with their peers, and participate in a skills day in the MSHS simulation lab. The RN fellows will have an opportunity to rotate through another critical care unit to gain a different perspective on the management of critically ill patients.

Candidate Requirements

- Graduation from an accredited baccalaureate nursing program with a GPA of 3.5 or higher
- Prior clinical experience in a critical care setting preferred
- Successfully passed the NCLEX prior to the cohort start date
- A strong interest in a career path as a critical care nurse
- Satisfactory interview with a recommendation for hire from a MSHS Nurse Manager
- Ability to communicate effectively and collaborate with all members of the team
- Signed agreement of a two-year work commitment
- Current Basic Life Support (BLS) certification from the American Heart Association

Curriculum Details

The Adult Critical Care/ICU Fellowship Program will be offered for the first time in 2025. The first cohort will start on **September 2, 2025**.
