- New York State RN License

## Nurses Creating Excellence

### Locations

The Mount Sinai Hospital - Level 4  
Mount Sinai West -Level 3

### Orientation Start Date

August, 2024 (tentative)

Nurses are at the heart of neonatal healthcare, showcasing compassion and valued expertise as they provide and coordinate patient-centered care round the clock. This post-Baccalaureate training program is designed to empower freshly graduated nurses with specialized knowledge and skills in the field of neonatal intensive care. Over the course of an enriching 24-week journey, our RN fellows engage in rigorous academic lectures on neonatal care, perfect their skills in state-of-the-art simulation labs, and gain hands-on experience by rotating through various neonatal units. Upon completion, our graduates emerge as well-rounded nurses, fully equipped to excel in delivering high-quality, evidence-based care for our youngest patients in the neonatal intensive care unit.

**Applications will be accepted after June 1, 2024.**
