65-79 34.1%
50-64 32.6%
35-49 14.4%
19-34 7.7%
80+ 11.1%
12-18 0.1%

Intensity of Therapy

On average, our patients receive 3.2 hours of therapy per day, including Physical and Occupational Therapy, Speech Language Pathology and Neuropsychology. Supplemental activities are offered daily by our Therapeutic Recreational Specialists.

Data Sources: 2020 Uniform Data System, MedTel
**Functional Improvement**

The effectiveness of rehabilitation care is measured by improvement in functional status. This quality measure demonstrates the change in scores for self-care and mobility from admission to discharge. Our patients make significant gains in function and independence during their stay.

**Discharge**

The majority of our patients are discharged back to the community following inpatient rehabilitation. Some patients (18.7%) require further rehabilitation in a sub-acute setting prior to returning home. A percentage (12.8%) require transfer to the acute hospital for further medical management.

**Patient Satisfaction**

95.5% of patients are satisfied with the programs at The Mount Sinai Rehabilitation Center
