### Expanding Care Beyond Multiple Sclerosis

As our understanding of autoimmune disease evolves, care at The Corinne Goldsmith Dickinson Center for Multiple Sclerosis continues to expand. Sam Horng, MD, PhD, explores how overlapping conditions affect the brain and spinal cord, advancing more comprehensive diagnosis and treatment for complex neurological disorders.

### Out of Office: Finding Harmony With Ilona Silva Alvarez, LMSW

At The Corinne Goldsmith Dickinson Center for Multiple Sclerosis, teamwork extends beyond the workplace. Ilona Silva Alvarez, LMSW – pictured above in the third row, holding an apple with both hands in the shape of a heart - shares how singing with a New York City chorus reflects the same balance, collaboration, and connection that define patient care at the MS Center.
