Assessment and Management of Patients with Surgical Wounds

Course Description

Upon completion of this one day course, participants will demonstrate an understanding of wound assessment and management for patients with acute and chronic wounds in various clinical settings.

Objectives:

1. Explain importance of evidence based practice
2. Explain the function of skin integrity
3. Discuss risk factors affecting wound healing
4. Identify surgery best practice guidelines
5. Discuss medical conditions that may require surgery and fecal or urinary diversions
6. Identify and review management of drains and tubes
7. List elements of wound assessment
8. Discuss principles of wound bed preparation and debridement options
9. Identify dressings for treatment of wounds
